

GASCON

CHICKPEAS

BENEFITS

QUALITY ORGANO-LEPTIC

- Superior taste quality.
- Valorization in human nutrition.
- high size: 8 to 9 mm.

TOLERANCE ASCOCHYTA RABIEI

- Very good behavior in front of Ascochyta Rabiei.
- Variety rated tolerant to very tolerant.

IDENTITY CARD

- ✓ **Type:** KABULI
- ✓ **Registered:** France 2020
- ✓ **TWK:** High 410 g to 430 g
- ✓ **Size:** High 8 to 9 mm
- ✓ **Plant height:** Average to high
- ✓ **First pod height:** Medium to high
- ✓ **Grain color:** Beige
- ✓ **Flower color:** White
- ✓ **Ascochyta Rabiei sensitivity:** Tolerant to very tolerant
- ✓ **Flowering:** Half-late
- ✓ **Lodging:** Tolerant

CULTURE TIPS

PLOT SELECTION

- **Avoid hydromorphic soils:** crop sensitive to excess water and root asphyxiation.
- **Avoid acidic and sandy soils.**
- **Prefer well exposed and drained soils, of clayey-limestone type, even superficial.**

IMPLEMENTATION

- Soils with a pH above 7 facilitate the establishment of nodules.
- Deep tillage is recommended to facilitate the implantation of nodules.

VERY GOOD POTENTIAL YIELD

- ✓ **Early variety for flowering out of high heat periods**
- ✓ **Seeding dates: 15 February - 15 March**

SEEDING

- ✓ **Sowing with a precision planter is recommended**
 - **Row spacing:** 30 to 60 cm
 - **Seeding density:** 45 to 55 seeds/m²
