

CDC ORION

CHICKPEAS

BENEFITS

QUALITY ORGANO-LEPTIC

- Superior taste quality.
- Valorization in human nutrition.
- Medium to high size: 7 to 9 mm.

TOLERANCE ASCOCHYTA RABIEI

- Very good behavior in front of Ascochyta Rabiei.
- Variety rated tolerant to very tolerant.

IDENTITY CARD

- ✓ **Type:** KABULI
- ✓ **Registered:** France 2019
- ✓ **TWK:** High 420 g to 440 g
- ✓ **Size:** medium to high 7 to 9 mm
- ✓ **Plant height:** Average (40 to 45 cm)
- ✓ **First pod height:** medium to high
- ✓ **Grain color:** Beige
- ✓ **Flower color:** White
- ✓ **Ascochyta Rabiei sensitivity:**
Tolerant to very tolerant
- ✓ **Flowering:** Early (52 days)
- ✓ **Lodging:** low sensitive

CULTURE TIPS

PLOT SELECTION

- **Avoid hydromorphic soils:** crop sensitive to excess water and root asphyxiation.
- **Avoid acidic and sandy soils.**
- **Prefer well exposed and drained soils, of clayey-limestone type, even superficial.**

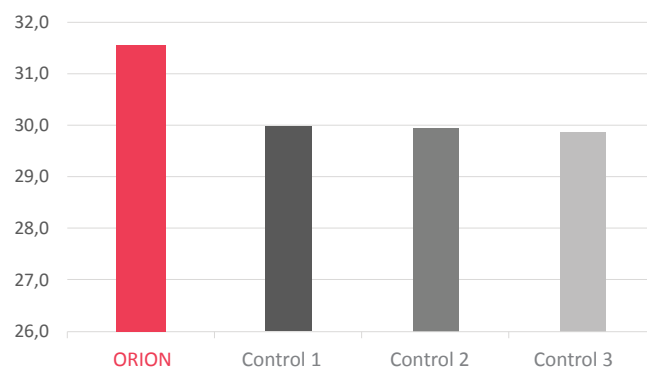

IMPLEMENTATION

- Soils with a pH above 7 facilitate the establishment of nodules.
- Deep tillage is recommended to facilitate the implantation of nodules.

VERY GOOD POTENTIAL YIELD

- ✓ **Early variety for flowering out of high heat periods**
- ✓ **Seeding dates: 15 February - 15 March**

SEEDING

- ✓ **Sowing with a precision planter is recommended**
 - Row spacing: 30 to 60 cm
 - Seeding density: de 45 à 55 seeds/m²
