

ES DISCOVER

EARLY MAIZE

BENEFITS

HIGH SILAGE YIELD

GOOD FEED VALUE

RECOMMENDED FOR BIOGAS

IDENTITY CARD

- Kernel type:** Flint
- Registered:** European Catalogue
- Accumulated temperatures:**
 - Silking date: 850°
 - Fodder (32% DM): 1470°

MORPHOLOGY

- Tall height and high ear insertion**

YIELD COMPONENTS

Rows/ear
15

Kernels/row
30

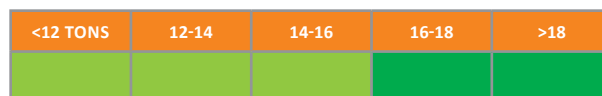

TKW
341

CULTURE TIPS

- **Medium potential location:**
- 97,000 seeds/ha
- **High potential location:**
- 97,000 seeds/ha

YIELD PROFILE

Perfectly adapted Less adapted

NUTRI PROFILE

Fibre digestibility (50 %)

Starch content (33 %)

Energy content (0,90 UFL)

Total digestibility (70 %)

AGRONOMIC PROFILE

Early Vigour

Harvest lodging

Smut

Stay-green

MULTIPLE USES

- High methanisation potential.
