

CS B/O MIXTE MTT

MEDIUM TERM GRASS MIXTURE

PERMITTED IN ORGANIC FARMING

BENEFITS

BETTER DISTRIBUTION OF PRODUCTION

- Thought for perennity thanks to Dactylis and to preserve the clovers.
- A mixture suitable for hay and pasture for 4 years!

BALANCED FORAGE

- Association allowing better aeration of the swath.
- The main productive period will be during spring but the dactylis allow a green field even during hottest summer.

IDENTITY CARD

KIND OF MIX

 Grass + Clover

DURATION

 3 - 4 years

CULTURE TIPS

- CS B/O MIXTE MTT can be used without risk of bloat if the proportion of clover is less than 50% visually.

USES

USES			POSITIONING				
Cutting	Mixed	Pasture	healthy and deep	Alternating wet/dry	Hydromorphic	Dry acid soil	Dry limestone soil

COMPONENTS

SPECIES/VARIETIES		CHARACTERISTICS
% in weight	% in number of plants	
Hybrid raygrass 4n SOLID ORGANIC		Early flowering with high yield potential.
15 %	16 %	
Hybrid raygrass 4n BOBAK		High yield in first cut with less inflorescence after this cut. That make very leafy regrowth with high quality.
25 %	16 %	
Dactylis LOKIS		Mid-late flowering with strong frost resistance. One of the most productive variety.
15 %	18 %	
Crimson clover ORGANIC		Increase the protein content of the forage for the 1st cut after sowing. Very good frost resistance.
15 %	8 %	
Red clover RESPECT ORGANIC		Increase the protein content of the forage and the yield in summer.
35 %	52 %
