

CS TRIOLUZ

ALFALFA

DORMANCY 4-7

BENEFITS

EXTENDS THE PRODUCTION PERIOD

- CS TRIOLUZ is a mixture of alfalfa with additional growth cycle: Start of spring and end of summer for the non dormant **RADIA**. Peak of spring for the dormant **ALISO** and **EXCELLE**.

EXCELLENT BLEND OF COMPLEMENTARY VARIETIES

- Each alfalfa variety reaches its potential in the season that is most favourable to it. Thanks to that, the yield is improved. With a mixture faster in spring and long duration in autumn, it's also possible to make 1 cut more than a dormancy 4 variety.

IDENTITY CARD

LATIN NAME

 Mix of *Medicago sativa*

DORMANCY

 Fall dormancy : **Excelle 4, Aliso 4, Radia 7**

CULTURE TIPS

- Uses coated seed for better establishment and ensure nitrogen fixing.
