

RAPID'HERB100

SHORT TERM GRASS MIXTURE

BENEFITS

FAST AND PLENTIFUL

- **RAPID'HERB100** is the ideal solution to obtain quickly (4 to 7 months for fall sowing) a large production of fodder concentrated on the first cut.

A RICH AND BALANCED FORAGE

- **RAPID'HERB100** contributes to the improvement of protein content of the basic ration thanks to clovers.

LOW INPUT FORAGE

- In addition to its nutritional gain, **RAPID'HERB100** saves nitrogen fertilization and has a beneficial effect on the soil structure.

IDENTITY CARD

KIND OF MIX

 Grass + Clover

DURATION

 < 1 year

CULTURE TIPS

- **RAPID'HERB100** can be used to make silage before corn.

COMPONENTS

SPECIES/VARIETIES		CHARACTERISTICS
% in weight	% in number of plants	
ITALIAN RAYGRASS 2n ENSILOR		Leafy variety with late flowering. Can be cut two time in spring. Outstanding yield.
32 %	37 %	
Westerworld raygrass 2n CHOISI		Very "westworld" with fast productivity but late flowering. Good disease resistance.
16 %	13 %	
Crimson clover		Flowering date close to that of raygrass. Good adaptation to all kind of soil.
38 %	18 %	
Persian clover organic		Fast growth in autumn as in spring. Could be frost sensible with early sowing. The best for summer/autumn production.
14 %	17 %	

AGRONOMIC CHARACTERISTICS

-  Suitable for fall sowing date
-  Can be harvested before winter then in spring
