

LIDSYMBIO LFA +

SERVICE PLANT MIX

COMPANION PLANTS

BENEFITS

MULTI SERVICES FOR RAPESEED

- Protect against pest,
- Provide nitrogen,
- Limit the weed's development.

EXCELLENT SOIL COVER

- **LIDSYMBIO LFA +** consists of species with strong summer growth for rapid soil cover.
- The different parts of the plants that make it up allow additional space to be occupied.

THE ADVANTAGE ES ALICIA

- The early appearance of the flowers of **ES ALICIA**, attracts the *Meligethes aeneus* and allows them to provide them with the pollen they are looking for, without these insects destroying the flower buds of the cash rapeseed variety. The impact of the *Meligethes aeneus* is therefore reduced.

IDENTITY CARD

 **Families used:** Fabaceae

 **Sowing rate:** 20 kg/ha

CULTURE TIPS

- **Rotational uses:**
- rapeseed
- Sown it before or on the same time of rapeseed at early date to maximise the biomass production until winter.
- The herbicide program should be adapted.

COMPONENTS

SPECIES	% IN WEIGHT	NUMBER OF PLANT/M²	WEIGHT BY HA
Lens	49	46	9,8
Fenugreek	40	52	8
Berseem clover	10	68	2
Early rapeseed ES ALICIA	1	3	0,2
TOTAL	100	169	20

AGRONOMIC CHARACTERISTICS

 **Forage uses:** no

Aptitude for summer sowing

Aptitude for fall sowing

Aptitude for winter sowing

Aptitude for broadcast sowing

Development speed

Biomass potential

Weed control

Nitrogen catching

Nitrogen production

Slug sensibility

Honey potential

Frost sensibility
