

# SOMTUOSO CS

## WINTER WHEAT

### BENEFITS

#### VERY GOOD TOLERANCES AGAINST DISEASES

**SOMTUOSO CS** is a wheat with a broad and balanced sanitary profile. It shows very good résistances to foliage diseases and to fungal pressures. Those characteristics permit to **SOMTUOSO CS** to have a healthy appearance even the years with a strong diseases pressure.

#### PRODUCTIVE WHEAT

**SOMTUOSO CS** has good results in the trials where it is sown. Its yields are over the plot potentiel and it often is in the leaders.

#### GOOD SOIL COVERING

Thanks to its tillering capacity, its large leaves and its awned ears, **SOMTUOSO CS** has a profile which covers well the soils from bolting to maturity. This permits to the crop to fight better against weeds.

### IDENTITY CARD

- Registration: 2017
- Technological class: Bread wheat, B type
- Alternativity: 4 Mid-winter
- Earliness of bolting: 4 Early
- Earliness of earing: 6,5 Mid early
- Ear type: Awned

### CULTURE TIPS

- SOMTUOSO CS** fits with a sowing in the North of France, the North of Italy and Center and East Europe.
- The high specific weight of **SOMTUOSO CS** secure the raising.
